Hey Jamal, In getting ready to talk to Tony/Stacey on the GA Flow Policy next week, I've pulled up the documents where we addressed the companion issue in SC (attached). I think I will go ahead and use a similar format to address GA's interim flow policy. Because the state used the interim instream flow policy in a CWA permit recently in Carroll County – I just want to make sure that Stacey and Tony both understand any vulnerability we may have and can convey that up the chain, if needed. I have just refreshed them on the SC issue as it's come up again with the State who has kicked the can down the road on developing a flow standard – waiting til 2022. I believe the NGOs were not happy about that.

Anyhoo, I created a folder on the FWG SPS called State Flow Rules and Policies. If you have the chance to pull up any documents relative to GA (for instance, I believe you sent me a letter – was it the kickoff?) – where we told them in writing to not use it. I know we also said that verbally at the Dec. 2019 meeting on the CCWA, and of course, it in the letters to the ACOE and the basis for the amendments to the GA Water Supply Partnering Agreement. I regret very much that we did not make process on that Partnering Agreement. If we had, we would have addressed the issue back then. Sigh.

Lisa
